

The Department of Geography and Geology UWI Mona
in collaboration with the National Spatial Data Management Division
presents

APPLIED GIS & REMOTE SENSING

Department of Geology and Geography
Computer Lab, UWI Mona

THE COURSE

The course provides an advanced understanding of the theoretical principles, concepts and components of GIS, Remote Sensing and Global Navigation Satellite Systems (GNSS). Emphasis will be placed on the development of requisite practical spatial skills and hands-on experience in the generation, manipulation, storage, management, maintenance, visualization, web publication and analysis of geospatial data.

COURSE INCLUDES

- Remote Sensing principles, concepts and components
- Geodatabase creation and population
- GIS Web Mapping
- GIS Programming and Application Development
- SDI and Geospatial Standards

SPECIAL INTRODUCTORY PRICE

- LICJ Members \$40,000
- Private Sector \$50,000
- UWI Student Rate (3 credit course)
